

About the Author
Shaffi Babu

A visionary leader in today's Healthcare Technology, he has over 25 years of experience across the most reputed Hospitals & Healthcare projects in India and Middle-east. He has managed high-impact portfolios in Project Management, Technical Services, Healthcare IT, Service Operations, Digital Transformation & Artificial Intelligence.

His contribution has been instrumental in securing prestigious JCI and CDAC accreditations for major healthcare institutions, supported by the implementation of globally recognized standards such as ISO/IEC 27001, ISO 9001:2000, ISO 13485: 2016, and ISO 45001:2018 to strengthen compliance, quality, and safety systems.

He has graduated from South India's premier PSG Institutions and Coimbatore Institute of Technology, also with an Executive Leadership Program at IIM Indore. His academic and professional qualifications include an MBA, a core foundation in Biomedical, certifications in Project Management, Six Sigma Black Belt, Service Quality, Negotiation Mastery, and Occupational Health & Safety. He also holds an Advanced AI certification from Steinbeis University, Berlin.

A passionate mentor and educator, he actively trains Biomedical interns. His commitment to bridge the gap between academia and field is reflected in every page of this book with selected set of medical equipment for the fresh graduates keeping in mind what they will face in reality.

This isn't just a book - ***it's an Intern's field guide.***

Drawing directly from decades of first-hand challenges, strategic decisions, and project breakthroughs, the book presents common problems and first line measure to attempt the challenge. It's tailored to equip Biomedical students, interns, and aspiring professionals by explaining the simple working principle, application, problem & troubleshooting of selected Medical devices

Author's Note

My goal is simple—equip you to learn, lead and excel in the world of healthcare innovation."
